

## Raincoast Field School @home

### Intertidal Part Two: Raincoast Challenge

Head down to your local tide pool and find some critters! See if you can identify some of their adaptations and behaviors!

Animal Number 1: \_\_\_\_\_

What do you notice about the animal's habitat? Does the tide cover its pool every day?

---

---

---

What do you observe the animal doing?

---

---

What body parts or features could the animal use to protect itself? What makes you think that?

---

---

What kinds of behaviors could the animal use to help protect itself? How?

---

---

What adaptations does the animal have to help it feed?

---

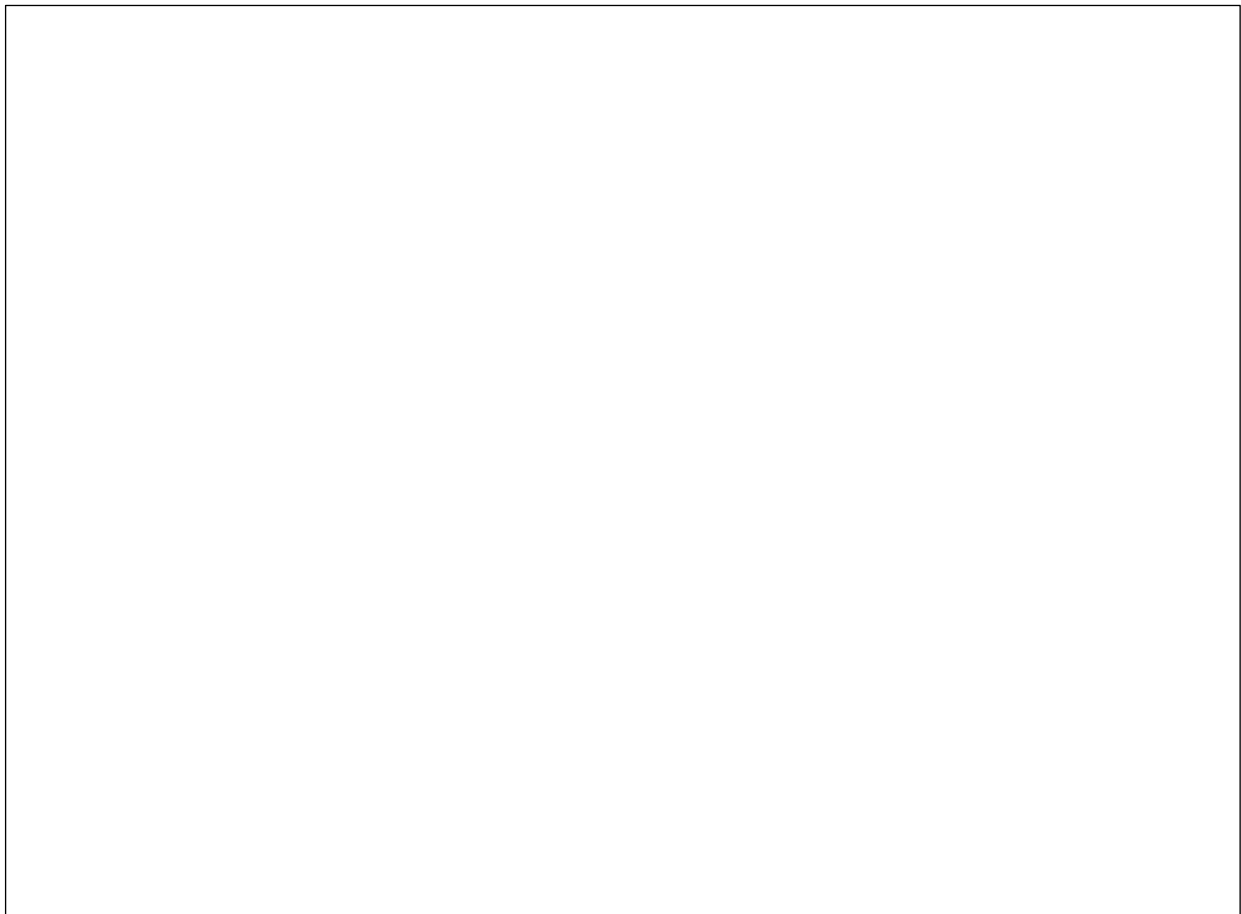

---

Do you think your animal would be considered more of a predator, or prey? Why?

---

---

Draw your first animal in the box below:

Animal Number 2: \_\_\_\_\_

What do you notice about the animal's habitat? Does the tide cover its pool every day?

---

---

---

What do you observe the animal doing?

---
