

Raincoast Field School @home

Subtidal Raincoast Challenge

Head out to your favourite beach and try to find 5 different algae (seaweeds)! Draw them in the box below.

Tell us the difference between the intertidal zone and the subtidal zone!

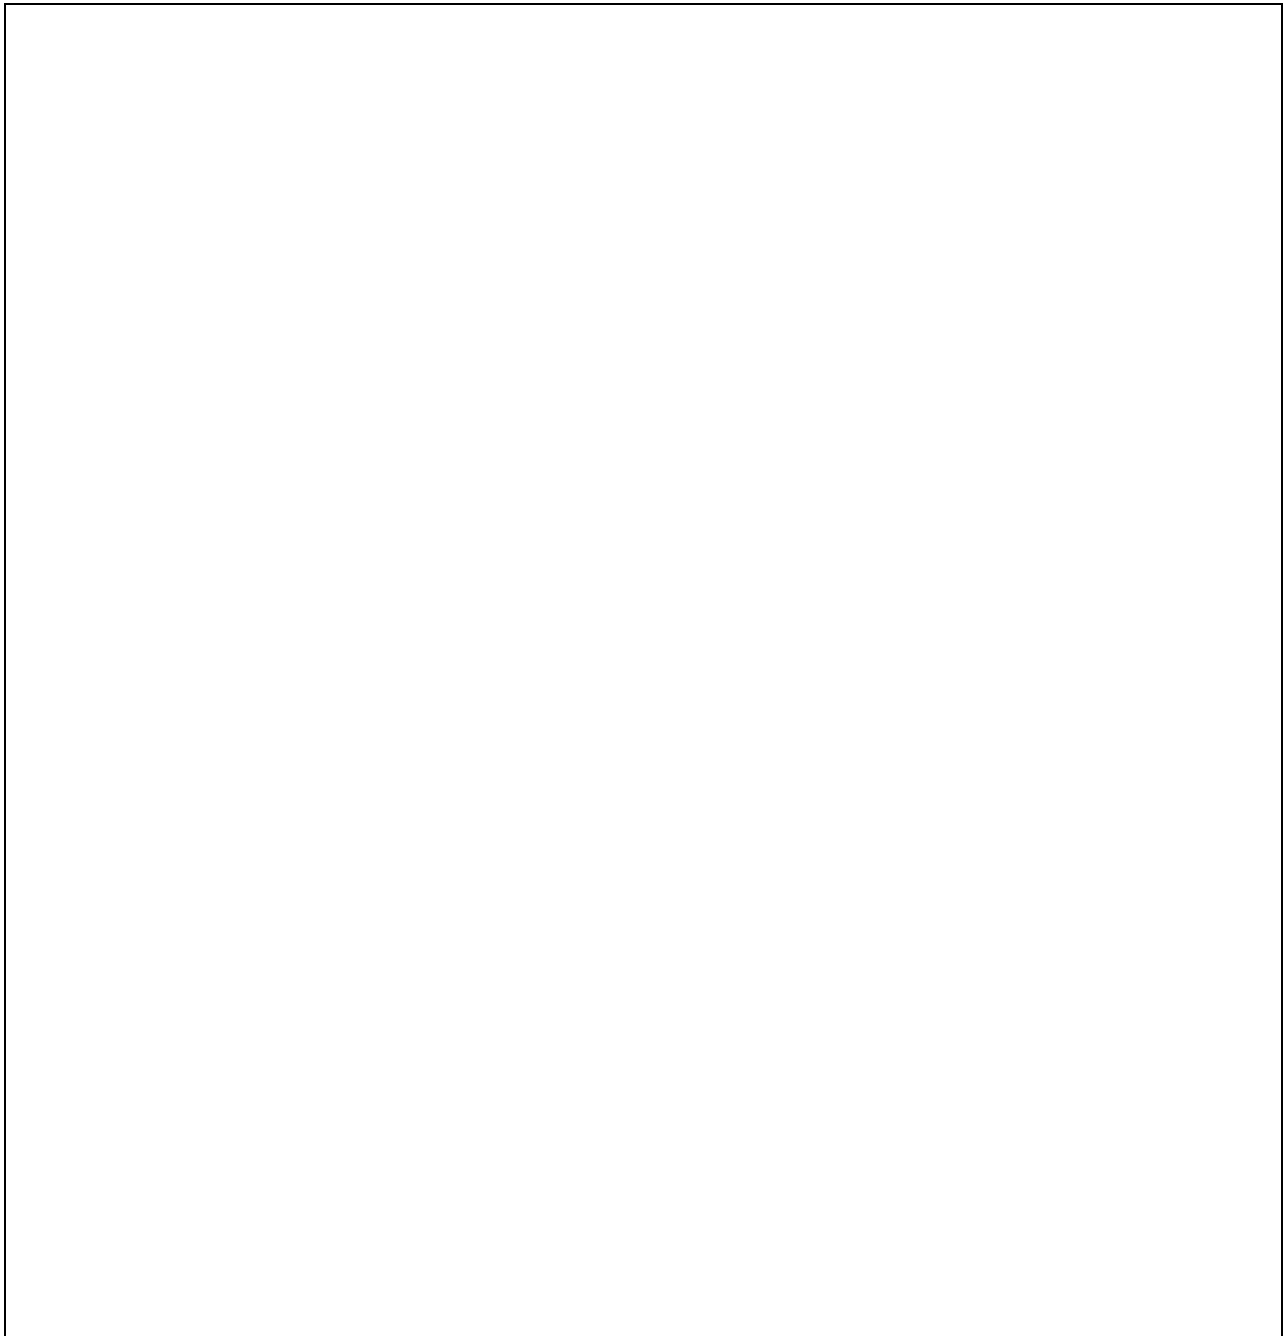

Do you think the seaweeds you found are from the intertidal zone or the subtidal zone?

Why do you think that?

What do seaweeds in the subtidal zone need in order to survive in their deep depths?

What other adaptations do subtidal creatures have that help them survive predator or hunt other creatures?

Draw a picture showing the four intertidal biobands and the subtidal zone. Draw 3 creatures that you might find in each zone!

Thank you so much for joining us for all these super fun field school @ home episodes! We had so much fun sharing them with you. Tell us about your favourite episode, and why you liked it! Draw a picture of your favourite scene!
